

Working Towards a "Gruener" Environment

Gruene Environmental Companies (GEC) is a full service environmental company specializing in environmental remediation, hazardous and non-hazardous waste management, in-plant services, and transportation that provides services directly to small quantity generators, large quantity generators, engineers, and consultants on a wide variety of environmental projects. GEC has offices and representatives located in New Braunfels, Austin, and Houston. With the structure of Gruene Environmental Companies comes the ability to provide a full line of environmental services.

A COMMITMENT to provide all environmental services quickly, efficiently and to fulfill the needs of our customers is the cornerstone of our success. GEC services have expanded rapidly due to recognition, and a level of service to an ever changing environmental world that is second to none. GEC is continually focused on the need to respond effectively, act professionally, and perform safely at each step throughout the project. Our goal is to work with our customers towards a more sustainable environment.

The Gruene Structure

Gruene Environmental Construction

Environmental Construction is where GEC began. GEC's project experience includes spill cleanups, large scale soil excavation, UST removals, PCB transformer removals, environmental site remediation, confined space entry, and industrial cleaning services.

Gruene Waste Services

Gruene Waste was formed in 2011 to provide a specialized division for Haz/Non-Haz waste disposal. Gruene Waste specializes in lab packs and industrial waste management. GWS can manage classification, profiling, manifesting, transportation, and disposal of waste streams to ensure you are in compliance with all local, state and federal regulations.

Gruene Plant Services

Gruene Plant will provide the personnel to manage all aspects of waste disposal, recycling, and remediation projects at your facility. GPS allows the customer to focus on their core competencies while we focus on ours.

Gruene Transportation and Supply

Gruene Transportation and Supply provides a variety of products associated with waste disposal, environmental remediation projects, and any specialty trucking needs your facility or project requires.
