

Working Towards a "Gruener" Environment

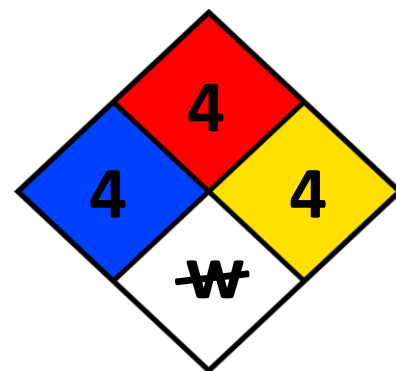

Gruene Waste Services

A DIVISION DEDICATED TO WASTE...

Gruene Waste Services (GWS) manages waste transportation and disposal of hazardous and non-hazardous materials generated during daily operations, and materials from remediation and industrial cleaning projects. GWS has on staff a chemist that will characterize all waste streams generated at your facility, and profile these streams for the most efficient and cost effective disposal technology. All treatment, storage, and disposal facilities (TSDF) utilized by GEC have met or exceeded our stringent compliance requirements. This stipulation enhances each of our clients' ability to minimize its liability in a cost-effective manner.

GWS also provides lab pack services which include generation of inventories, classification, segregation, packaging, marking and labeling, identification of unknowns, arranging for transportation, site approvals, manifesting, and all other regulatory paperwork.

With a fleet of company owned trucks, and 40HR HAZWOPER certified drivers, GWS has the ability to provide a turn-key solution to your facilities' bulk and containerized waste. We can provide economic and personal waste management services through either our "full load," or less than truckload (LTL) containerized waste program. These services include sampling, analysis if required, profiling, approvals and documentation, over-packing when necessary, transportation, and disposal. Treatment and disposal options through our approved network of TSDF's, and using our endorsed and fully permitted transportation fleets, allows for economical waste management.

Gruene Waste Services

- Hazardous/Non-Hazardous Waste Characterization
- Waste Material Profiling
- Hazardous/Non-Hazardous Waste Transportation
- Hazardous/Non-Hazardous Waste Disposal
- Recycling
- Lab Packs/Lab Moves
- Vacuum Trucks (130bbl and 70bbl)
- Field Chemists
- Regulatory Paperwork Management
- Waste Labels
- Regulated 10-day Transfer Facility
- Bulk Waste Management
- Drum Management
- Roll Off Boxes and Transportation
- Vacuum Boxes
- Licensed Asbestos Transportation
- Bulk Oily Water
- Universal Waste Handler
